

DO YOU KNOW THAT UNLIMITED SEASONAL TRAPPING OF BOBCATS IS CURRENTLY ALLOWED THROUGHOUT CALIFORNIA?

DO YOU KNOW THAT MANY OF THESE TRAPPERS SELL BOBCAT PELTS TO OVERSEAS MARKETS FOR PROFIT?

PROJECT BOBCAT BELIEVES THAT BOBCATS ARE FAR MORE VALUABLE AS WILDLIFE THAN AS PELTS!

If trapping bobcats across the state concerns you, please help Project Bobcat in our organized effort to pass California State Assembly Bill 1213, The Bobcat Protection Act (D-Bloom).

As AB 1213 moves through the California State legislature this summer we need concerned citizens like yourself to join our cause and express support of AB 1213 to ensure that this important bill becomes law.

Through targeted action alert campaigns we will notify you of timely calls to action. For more information on AB 1213 and to sign up for Action Alerts please visit our website at: www.projectbobcat.org.

*Project Bobcat's mission is to protect and promote awareness concerning the welfare of *Lynx rufus*—the American bobcat. We are a grass-roots community organization of concerned local residents, property owners, business owners, and environmental activists located at the gateway to Joshua Tree National Park that seeks to revise current California Fish and Wildlife hunting and trapping regulations that currently negatively affect this significant and much loved local wildlife asset with more progressive management policies. We believe that wild, healthy bobcat populations are a vital and important part our community and we strive to defend their existence in our backyards, region, and state.*
